

Animal Disposal Plan

Pilot Draft Version 8-00

Purpose: Presence of trichinae encysted larvae in the meat of dead mammals is a source for exposing swine. Because swine frequently will consume the remains of dead animals, all dead swine should immediately be removed from pens. Prompt removal of the carrion from the premises or prompt disposal by other accepted methods will eliminate the carcass from attracting other wild mammals to the premises. All disposal methods and time limits for disposal of dead animals must be compliant with state animal health, dead animal disposal regulations.

Objective: The trichinae auditor shall review, approve, and observe for evidence confirming the continued implementation of the items contained within this animal disposal plan.

An example Animal Disposal Plan:

1. All swine located at the premises are observed at least ____ times per day. Intervals between observations are not less than ____ hours.
2. All dead swine and other dead mammals will be disposed of within ____ hours.
3. Swine and other mammals greater than _____ pounds shall be disposed of promptly by an approved method. If rendering the carcass the rendering company will be called promptly or will have an established pickup time. If rendering fill in the following:

Rendering company's name: _____

Address: _____

Phone number: _____

4. Dead animals will be placed in a mammal proof container until disposed of.
5. Swine or other mammals less than, or equal to, _____ pounds shall be disposed of by incineration, composting, or buried according to regulations or procedures provided by local and state government or other environmental agencies.

I have implemented, and continue to follow, the animal disposal plan outlined above.

Owner's signature: _____ date: _____

Caretaker's signature: _____ date: _____
(if different from owner)

Animal Movement Record

Pilot Draft Version 8-00

Purpose: To ensure that swine maintain trichinae certified status during the growing phase until delivered to the packing plant, animal movement records are required. These records if organized and maintained properly will confirm all swine entering onto the premises originated from other trichinae certified production sites.

Objectives: In order to be considered for approval as a trichinae certified production site, a trichinae auditor shall review, approve, and observe records confirming the continued documentation of arrivals and departures of swine to and from this trichinae certified production site.

An example animal movement record:

Date:_____ and Beginning Inventory:_____

Date:	# Arriving:	Source Name:	St:	Source TIN:	# Departing:	Destination:	# Deads:
-------	-------------	--------------	-----	-------------	--------------	--------------	----------

_____	_____	_____	_____	_____	_____	_____	_____
_____	_____	_____	_____	_____	_____	_____	_____
_____	_____	_____	_____	_____	_____	_____	_____
_____	_____	_____	_____	_____	_____	_____	_____
_____	_____	_____	_____	_____	_____	_____	_____
_____	_____	_____	_____	_____	_____	_____	_____
_____	_____	_____	_____	_____	_____	_____	_____
_____	_____	_____	_____	_____	_____	_____	_____
_____	_____	_____	_____	_____	_____	_____	_____
_____	_____	_____	_____	_____	_____	_____	_____

Date:_____ and Ending Inventory:_____

I have implemented and continue to record animal movements as outlined above.
